Watercolor Workshop-Tricia Spencer

Students will explore and continue to develop their skills for making expressive paintings. This will be a really exciting workshop since we will be including figurative studies. If the weather is good we will also be working on location at the beautiful Baker University campus that is only one block from the Art Center. Composition, the use of light and the transparent effects of watercolor will be explored. Feel free to experiment with the wonderful light and transparent effects of this exciting medium. Students will learn to see how these elements can be used in their work to create the depth, dimension and excitement in their work by using color. Examples from other artists will help students understand how they employed various techniques to achieve expressive, lively qualities in their paintings.
